

Scatter plot showing Recall@10 (X-axis) versus Precision@10 (Y-axis) for various methods. The X-axis ranges from 0.0 to 1.0, and the Y-axis ranges from 0.0 to 1.0. The methods are represented by different symbols and colors:

- PyANNS** (Grey triangles): High precision and recall, clustered near (1.0, 1.0).
- SEISMIC** (Grey diamonds): High precision and recall, clustered near (1.0, 1.0).
- SINDI** (Grey triangles): High precision and recall, clustered near (1.0, 1.0).
- kANNolo** (Grey diamonds): High precision and recall, clustered near (1.0, 1.0).
- SparseHM** (Blue circles): High precision and recall, clustered near (1.0, 1.0).
- GrassRMA** (Grey circles): High precision and recall, clustered near (1.0, 1.0).
- Other methods** (Grey squares, triangles, diamonds, circles, pluses): Scattered across the plot, generally showing lower precision and recall compared to the top-performing methods.
